

How to determine over phone if a person is eligible for an ultrasound

1. Ask: Are you certain you are pregnant?
2. If yes, how far along are you in your pregnancy?
3. Have you seen a doctor already? (If yes, and they are far along –we cannot offer you an ultrasound, but EWYL.)
4. Do you need a proof of positive pregnancy form? (If yes, we can schedule a pregnancy test then determine later whether to do an ultrasound).
5. If they are past 20 weeks and have not seen a doctor—we can schedule a pregnancy test and give proof of positive pregnancy, but not an ultrasound.
6. If they give any indication of an unplanned pregnancy, or risk of being abortion minded, schedule them for an ultrasound (the reason being that seeing the baby might change their mind).
